Kelas : IF-1

LISTING PRAKTIKUM ALGORITMA DAN PEMROGRAMAN LANJUT

MODUL 3

ARRAY 1 DIMENSI

PRAKTIK

Praktik 1

```
import java.util.Scanner;
public class ArrayInputUser {
    public static void main(String[] args) {
        int bilangan[] = new int[4];
        int i,j;
        Scanner input = new Scanner(System.in);
        for (i=0;i<=3;i++) {
            System.out.print("Silahkan masukan bilangan : ");
            bilangan[i] = input.nextInt();
        }
        //untuk menampilkan array dan menentukan genap/ganjil
        for (j=0;j<=3;j++) {
            if(bilangan[j]%2 == 0 ) {
                System.out.println("Bilangan yang anda masukkan genap" + " " + bilangan[j]);
            } else {
                System.out.println("Bilangan yang anda masukkan ganjil" + " " + bilangan[j]);
            }
        }
    }
}
```

```
C:\WINDOWS\system32\cmd. x + v
Silahkan masukan bilangan : 1
Silahkan masukan bilangan : 2
Silahkan masukan bilangan : 3
Silahkan masukan bilangan : 4
Bilangan yang anda masukkan ganjil 1
Bilangan yang anda masukkan genap 2
Bilangan yang anda masukkan ganjil 3
Bilangan yang anda masukkan genap 4
Press any key to continue . . . |
```

Praktik 2

```
import java.util.Scanner;
public class Larik2 {
    public static void main(String args[]){
        Scanner masuk = new Scanner(System.in);
        float nilai[] = new float[5];
        float total,rata,max,min;
        System.out.println("Masukan 5 buat data nilai");
        for (int i = 0; i < 5; i++)
        {
            System.out.print(" ( i + 1 )" + " : ");
            nilai[i]=masuk.nextFloat();
        }
        System.out.println("Data nilai yang dimasukan");
        for (int i = 0; i < 5; i++)
            System.out.println(nilai[i]);
        total = 0;
        max = nilai[0];
        min = nilai[0];
        for (int i = 0; i < 5; i++){
            total = total + nilai[i];
            if (nilai[i] > max) {
                max = nilai[i];
            }
            if (nilai[i] < min) {
                min = nilai[i];
            }
        }
        rata = total/5;
        System.out.println("Total data = "+total);
        System.out.println("Rata-rata = "+rata);
        System.out.println("Nilai Maksimum = "+max);
        System.out.println("Nilai Minimum = "+min);
    }
}
```

```
C:\WINDOWS\system32\cmd. x + v
Masukan 5 buat data nilai
1 : 50
2 : 60
3 : 70
4 : 80
5 : 90
Data nilai yang dimasukan
50.0
60.0
70.0
80.0
90.0
Total data = 350.0
Rata-rata = 70.0
Nilai Maksimum = 90.0
Nilai Minimum = 50.0
Press any key to continue . . . |
